Experience

PhD Student
Uppsala University, Department of Business Studies
2026 – Now
Department of Business Studies

Systems Developer
Lund University, Department of Art and Cultural Sciences
2023 – 2026
Department of Art and Cultural Sciences

Research Engineer
Lund University, Department of Media and Communication
2021 – 2023
DigitalHistory@Lund

Research Assistant
Lund University, CIRCLE
2020 – 2021
Experimentally Organised Economy, CIRCLE

Research Assistant
Lund University, Department of Economic History
2015 – 2018
SWINNO, Department of Economic History

Projects

Contentious Gatherings
Lund University, 2024 – 2027+
The Contentious Swedes: Repertoires of contention and democratization in Sweden, 1820-1939 is a VR-financed History project that deepens our understanding of Sweden's democratization by examining changes in the political use of public space from 1820 to 1939. The project sheds light on the political use of Contentious Gatherings such as public meetings, election meetings, and demonstration marches in public space. The starting point is that public meetings in Sweden in 1820 were forbidden, while they in 1939 not only were permitted, but also that most people then had knowledge of and access to the public space to make politics.

Secrets to Patents
Lund University, 2025 – 2030
The Research Environment Secrets to Patents investigates the long-term history of how life-saving and health-improving medicines became for-profit commodities from 1500 to 1900. Focusing on the Atlantic Colonial Nexus, the project's team investigates the strategies that different historical agents used to claim ownership of medicinal knowledge.

Tal om Kvinnor
Lund University, 2025 – 2026
Vem talar om kvinnor, när, i vilken utsträckning och hur i Sveriges riksdag under perioden 1900–1940? Vilka positivt och negativt laddade ord, epitet, metaforer och mönster av argument framkommer i några utvalda anföranden och replikväxlingar, jämt fördelade över perioden? Hur kommenteras dessa anföranden i den samtida pressen?

Conceptualizing Empire
Lund University, 2026 – 2026
Recent years have seen increasingly large and vocal movements calling for restitution for the crimes of colonialism. But who exactly was responsible? How did different groups of citizens in colonizing countries understand and think about colonial conquest and rule? What political role did they play supporting such aggression?

DigitalHistory@Lund
Lund University, 2021 – 2023+
DigitalHistory@Lund is an interdepartmental research platform dedicated to advancing digital history research at Lund University. It works to integrate existing digital history projects and supports the design and execution of new projects. At the same time, the platform strives to build local digital history capacity through skills training workshops, research seminars, research engineer support, and by developing new courses in digital history.

SWINNO
Lund University, 2015 – 2025
The SWINNO project was a series of research projects into Swedish innovations and the Swedish innovation system. Many of these projects are based on the SWINNO database of Swedish innovations, often with additional data from for example surveys, interviews and policy documents.

Modern Times 1936
Lund University, 2023 – 2025
What is it that software sees, hears and perceives when technologies for pattern recognition are applied to media historical sources?

Uppsala Patent History Group
Uppsala University, 2026 – Now
We perform research and analysis on the business, economics and history of technology and innovation using detailed historical intellectual property data. We also develop and manage the Swedish Historical Patents Infrastructure (SHPI).

Education

Economic History
Master Programme
Lund University, Department of Economic History
2014 – 2016

Finance and Banking
Bachelor Programme
Babeș-Bolyai University, Department of Finance
2011 – 2014

Teaching & Learning - Extension
Independent course
Lund University, Division for Higher Education Development
2023 – 2023

Teaching and Learning in Higher Education
Independent course
Lund University, Division for Higher Education Development
2022 – 2023

Deep Learning and Artificial Intelligence Methods
Master course
Lund University, Department of Statistics
2022 – 2023

Publications

Article, Journal of Digital History

Teaching

DIKA44: Project Management - Continuation (2026)
Lund University – First Cycle
Course Coordinator

ABMM06 - ALM: Research Methods (2025)
Lund University – Advanced
Held two lectures about quantitative methods.

DIKM01: Digital Historia (2025)
Lund University – Advanced
Three digital labs.

ABMF10: Digitalt kulturarv (2025)
Lund University – Advanced
Three digital labs.

HISS41 - Digital History (2024)
Lund University – Advanced
In the second iteration of the course, we expanded the methodology labs – a response to the student feedback from the previous year.

HISS41 - Digital History (2023)

Lund University – Advanced
My first time teaching a large part of a course. I was responsible for the methodology part.

ABMM06 - ALM: Research Methods (2023)
Lund University – Advanced
Prepared and held three lectures on rudimentary statistics and digital activities.

Software & Code

kb-trend
Application, 2025-12-18
This is a tool for extracting trendlines for searches in the National Library of Sweden's (Kungliga Biblioteket; KB) search API. It comes in two variants, firstly is the python implementation published on PyPI and therefore pip-installable. This tool is able to perform a battery of queries to create aggregated and disaggregated timelines. The second is a much simpler form, which is a SPA (Single Page Application) hosted as a static site on GitHub. This version performs a single query at a time and produces a downloadable .csv file of the data and relevant metadata – such as the full URL of the query.
Repository: https://github.com/DigitalHistory-Lund/kb-trend

ToK reader
Application, 2025-12-10
This is a JavaScript based tool for reading exchanges of utterances from the Swedish parliamentary debates for the *Tal om Kvinnor* project. The material is retrieved from the SWERIK project and has been pre processed in preparation for this reader, namely:
Repository: https://github.com/DigitalHistory-Lund/ToK-Reader

Journal Digital Corpus - Reader
Application, 2025-11-22
A javascript based SPA (Single Page Application) for exploring and reading the timestamped Journal Digital Corpus right in the browser. This is hosted as a static website on GitHub and loads the publicly available corpus into the user's browser to make it readable and searchable. It can also produce stable URLs with search queries and selected results. This way it is possible to create a permanent bookmark to a specific part of a specified version of the corpus.
Repository: https://github.com/Modern36/jdc_reader

Journal Digital Corpus - Map
Application, 2025-10-16
A javascript based tool for exploring the geographical dimensions of the Journal Digital Corpus.
Repository: https://github.com/Modern36/jdc-map

SweScribe
Application, 2025-06-02
Tool for automatic speech recognition of Swedish newsreels.
Repository: https://github.com/mathjoha/swescribe

stum
Application, 2025-06-02
A tool for extracting intertitle-texts from Swedish newsreels.
Repository: https://github.com/modern36/stum

sca
Application, 2025-05-23
This is a python + sqlite implementation of the method *Structural Collocation Analysis* as described in Structural reading: Developing the method of Structural Collocation Analysis using a case study on parliamentary reporting and used in Democracy (Not) on Display: A Structural Collocation Analysis of the Mother of All Parliaments' Reluctance to Broadcast Herself
Repository: https://github.com/mathjoha/sca

Personal Planerare
Application, 2024-10-03
A javascript based SPA (Single Page Application) for planning ratios between teaching and research at the Department of Arts and Cultural Sciences.
Repository: https://github.com/mathjoha/Kultur_Personalplaneraren

freewrite
Application, 2024-01-02

A *textual*-powered application for **freewriting**.
Repository: https://github.com/mathjoha/freewrite

CITADEL
Application, 2022-12-16
CITADEL (plaCename dIsambiguaTion AnD gEocoding appLication) is a toponym disambiguation tool developed during the course of the article **Historical GIS and Guidebooks**
Repository: https://github.com/mathjoha/citadel

Presentations

Audiovisual Memory: The Role of Preprocessing — Moderna Tider 1936 — 2026-07-30 — Presentation
Johansson, M., & Malmstedt, J.

Structuring the Private: Local LLMs as Cross-Cultural Annotators in Early Modern Correspondence — Rewriting the Past — 2026-07-29 — Presentation
Johansson, M., Gao, M., Lundström, C. & Hellman, L.

Building a Job Ads Database from Swedish Digitized Newspapers — JADB — 2026-04-25 — Invited talk
Johansson, M.

Developing a pipeline for extracting contentious gatherings from historical Swedish newspapers, 1820–1939 — Contentious Gatherings — 2026-05-21 — Workshop
Johansson, .M, Olofsson, O. & Brink Pinto, A.

Från stum film till sjungande metadata: Multimodal AI-analys av svensk journalfilm under ett halvt sekel — Modern Times 1936 — 2025-10-21 — Presentation
Aspenskog, R. & Johansson, M.

On the research project Modern Times 1936 — Modern Times 1936 — 2025-04-29 — Invited talk
Snickars, P., Stjernholm, E., Aspenskog, R. & Johansson, M.

From personal networks to public advertisements: Exploring historical recruitment practices through newspaper job ads — JADB — 2024-11-08 — Presentation
Gladoic Håkansson, P., Karlsson, T., La Mela, M. & Johansson, M.

From personal networks to public advertisements: Exploring historical recruitment practices through newspaper job ads — JADB — 2025-11-12 — Presentation
Gladoic Håkansson, P., Karlsson, T., La Mela, M. & Johansson, M.

Re-inventing the Wheel. Or: Following in the Footsteps of Keiji Kiriya, Sisyphus & Saehrimnir — 2024-11-08 — Presentation
Johansson, M.

Konfliktrepertoarer och demokratisering i Sverige. Tidiga utmaningar och resultat — Contentious Gatherings — 2024-11-07 — Presentation
Olofsson, M., Johansson, M. & Lundstedt, M.

Moderna Tider 1936, DigitaltMuseum & AI — Modern Times 1936 — 2024-09-25 — Invited talk
Johansson, M.

Modern Times 1936 — Modern Times 1936 — 2024-05-28 — Presentation
Stjernholm, E., Aspenskog, R., Johansson, M., Snickars, P. & Eriksson, M.

The contentious swedes. Repertoires of contention and democratization in Sweden,

1820–1939 — Contentious Gatherings — 2023-09-07 — Presentation
Olofsson, M. & Johansson, M.

Seminar on Structural Topic Modeling — Lund University — 2022-03-21 — Workshop
Johansson, M.

Events

Digitalhistorisk inspirationskonferens för HT-fakulteterna — Organiser, 2021-09-23, Conference
DigitalHistory@Lund: Transcription of handwritten texts with Transkribus — Organiser, 2022-04-01, Workshop
DigitalHistory@Lund Social Network Analysis för Historiker — Organiser, 2023-05-09, Workshop
DigitalHistory@Lund: Digitalhistorisk inspirationskonferens — Organiser, 2023-09-27, Conference
DigitalHistory@Lund Working Group — Organiser, 2023-09 – 2026-06, Workshop series

Explorations

SWINNO Dashboard — SWINNO
URL: https://github.com/swinnoproject/website
Interactive JS dashboard for innovation data.

SWINNO Datasette Lite — SWINNO
URL: https://github.com/swinnoproject/datasette-lite
Browser-based database explorer using Datasette Lite.

JDC Reader — ModernTimes1936
URL: https://modern36.github.io/jdc_reader/
JS corpus reader with stable URLs to individual entries.

JDC Map — ModernTimes1936
URL: https://modern36.github.io/jdc-map/
Browser-based visualization of locations mentioned in the corpus.

Tropes 1500 — ModernTimes1936
URL: https://modern36.github.io/tropes_1500/
Image and annotation browser with interactive bounding box visualizations.

JADB Timelines — JADB
URL: https://jobadsdata.github.io/jadb-1-timelines/
Interactive visualizations of job ad data over time.

JADB-37040 — JADB
URL: https://jobadsdata.github.io/JADB-37040/
Interactive visualizations of occurrences of a specific work title.

HISCOTrend — JADB
URL: https://jobadsdata.github.io/HISCOTrend/
Interactive visualizations of all HISCO work titles.

YouthTrend — JADB
URL: https://jobadsdata.github.io/YouthTrend/
Interactive visualizations of youth job titles.

ToK Explorer — Tal om Kvinnor
URL: https://digitalhistory-lund.github.io/ToK-explorer/
Visualizations of counts and relative counts of utterances about women.

ToK Reader — Tal om Kvinnor
URL: https://digitalhistory-lund.github.io/ToK-Reader/
Corpus reader with pattern-marked utterances and static URLs.

SecToPat Experiment Visualization — Secrets to Patents
URL: https://digitalhistory-lund.github.io/SecToPat-PhilTrans-ExperimentExtraction-Example1/
Visualization of an LLM experiment on historical text extraction.

Digital History Map — Personal
URL: https://digital-history.se/

Geographical visualization of Digital History projects.

Towers of Hanoi — Personal
URL: https://mathjoha.github.io/hanoi/
Towers of Hanoi in three.js.

Weekly Activity Tracker — Personal
URL: https://mathjoha.github.io/weekly/
GitHub activity tracker across projects.
