Position

PhD Student — Uppsala University, Department of Business Studies (2026 –)
Member of the *Uppsala Patent History Group*, researching technological evolution in Sweden.

Prior Positions

Systems Developer — Lund University, Department of Art and Cultural Sciences (2023 – 2026)

Research Engineer — Lund University, *DigitalHistory@Lund*, Department of Media and Communication (2021 – 2023)
Interdepartmental research platform for digital history at Lund: supporting projects with data collection, cleaning and analysis; helping prepare grant applications; and running skills-training workshops and drop-in sessions for researchers.

Research Assistant — Lund University, *Experimentally Organised Economy*, CIRCLE (2020 – 2021)

Research Assistant — Lund University, *SWINNO*, Department of Economic History (2015 – 2018)
The SWINNO database of Swedish innovations from 1970 to the present (with a historical extension back to 1889), together with a series of research projects on the Swedish innovation system that draw on it.

Education

MSc Economic History — Lund University, Department of Economic History (2016)
BSc Finance and Banking — Babeș-Bolyai University, Department of Finance (2014)

Selected Projects

Uppsala Patent History Group — Uppsala University, 2026 –. Research on the business, economics and history of technology and innovation using detailed historical intellectual property data; developing the Swedish Historical Patents Infrastructure.

Contentious Gatherings — Lund University, VR-funded, 2024 – 2027. Repertoires of contention and democratisation in Sweden, 1820 – 1939, through public meetings, election meetings, and demonstration marches.

Modern Times 1936 — Lund University, 2023 – 2025. Multimodal AI analysis of Swedish newsreels — what software sees, hears and perceives when pattern recognition meets media-historical sources.
JADB — Job Ads Database — Lund University, 2024 –. A new labour-market resource built from digitised Swedish newspapers, supporting historical research on recruitment and occupations.

Software

sca — Python + SQLite implementation of *Structural Collocation Analysis*. `github.com/mathjoha/sca`
SweScribe — Automatic speech recognition for Swedish newsreels. `github.com/mathjoha/swescribe`
kb-trend — Trendline extraction from the National Library of Sweden search API (Python package + web app). `github.com/DigitalHistory-Lund/kb-trend`

Teaching

DIKA44 Project Management – Continuation (2026, Lund, First Cycle) — Course Coordinator
ABMM06 ALM: Research Methods (2025, Lund, Advanced) — Two lectures on quantitative methods
DIKM01 Digital Historia (2025, Lund, Advanced) — Three digital labs
ABMF10 Digitalt kulturarv (2025, Lund, Advanced) — Three digital labs
HISS41 Digital History (2023 & 2024, Lund, Advanced) — Responsible for the methodology strand
ABMM06 ALM: Research Methods (2023, Lund, Advanced) — Three lectures on statistics and digital methods

Selected Presentations

Audiovisual Memory: The Role of Preprocessing — Digital Humanities 2026, Daejeon, 2026-07-30 (with Malmstedt, J.)
Structuring the Private: Local LLMs as Cross-Cultural Annotators in Early Modern Correspondence — Digital Humanities 2026, Daejeon, 2026-07-29 (with Gao, Lundström & Hellman)
Building a Job Ads Database from Swedish Digitized Newspapers — Historical Labour Markets in Text, Graz, 2026-04-25 — **invited**
On the research project Modern Times 1936 — Modern Times 1936 visiting JRC, Seville, 2025-04-29 — **invited** (with Snickars, Stjernholm & Aspenskog)
Moderna Tider 1936, DigitaltMuseum & AI — E-kultur Seminariet, Stockholm, 2024-09-25 — **invited**
Konfliktrepertoarer och demokratisering i Sverige. Tidiga utmaningar och resultat — Digital History Sweden 6, Växjö, 2024-11-07 (with Olofsson & Lundstedt)
Seminar on Structural Topic Modeling — Lund University, 2022-03-21 — workshop

Languages

Swedish — native
English — fluent
Romanian — conversational
